

Coracles can be incredibly useful in flooded areas due to their unique characteristics:

Rescue and Relief

- **Access to isolated areas:**
Travel through shallow & narrow waterways
- **Transporting people, goods, food, medicine, materials during floods**
- **Easy to transport, light weight, portable and carry to flood affected areas**

Uses

- **Communication:** it can serve communication between rescue teams and affected areas.

Applications

- **Fishing Industry:** Robust and manoeuvrable coracles for fishermen
- **Tourism & Eco-Trips:** Eco-friendly boats for backwaters, lakes, or rivers
- **Rescue & Emergency Response:** Swift, reliable boats for water rescue operations
- **Leisure & Sports:** Perfect for paddling, photography, or exploring nature
- **Supply distribution:** it can distribute essential supplies, such as food, water, medicine.

Maneuverable nature of coracles makes them an valuable asset in flooded areas. Customization were made according to the **customer needs**
